

G30W-N100 4LAN

Features

- | Support 4\*Intel 2.5G network card
- | Support HDMI+DP 4K display output
- | Support 1\*M.2; 1\*SATA III for storage
- | Alder Lake-N Processor Inside

Product Specifications

|                      |                                                                                                                                   |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Processor            | Intel N100 processor 4 Cores 4 Threads 3.40 GHz                                                                                   |
| Chipset              | Intel N-series N95/N100/N200/i3-N305 (Optional)                                                                                   |
| BIOS                 | AMI EFI BIOS                                                                                                                      |
| Memory               | 1*DDR5 4800MHz SODIMM Up to 16GB                                                                                                  |
| Storage              | 1*M.2 NVMe 2280 ; 1*SATA3.0 (Support 2.5 inch HDD/SSD)                                                                            |
| Display Chip         | Integrated Intel HD 600 Graphics Card                                                                                             |
| Display Port         | 1*DP port; 1*HDMI port                                                                                                            |
| Front I/O interface  | 4*2.5G Ethernet port 1*Power Adapter port 1*RJ45 COM                                                                              |
| Back I/O interface   | 2*USB3.0 4*USB2.0 1*HDMI (With audio output) 1*DP 1*Power Button 1*Power HDD LED 1*CLR-CMOS 1*4G SIM Card slot 1*5G SIM Card slot |
| Expansion slot       | 1*Mini PCIe Channel for WiFi/Bluetooth/4G 1*M.2 2242 (Support 5G Communication)                                                   |
| Ethernet port        | 4*Intel i226 2.5Gigabit Ethernet                                                                                                  |
| Other functions      | Power-on boot; Scheduled boot; Wake-up on LAN; PXE boot; Watchdog                                                                 |
| Power Supply         | DC 12V-4A 5.5*2.5                                                                                                                 |
| Certificate          | CE、CCC、FCC、ROHS                                                                                                                   |
| Size                 | 136x126x40 (MM)                                                                                                                   |
| Working Temperature  | -0~+50℃ (Commercial HDD); -20℃~+50℃ (Industrial SSD); Surface Air flow                                                            |
| Environment Humidity | 5~90RH, Non-condensing                                                                                                            |
| Weight               | Gross Weight 1.70KG; Net Weight 1.00KG                                                                                            |
| Package Size         | 20x17x12 (CM)                                                                                                                     |
